

# Yessin Aydi

ICT engineering student

 [yassineaydi35@gmail.com](mailto:yassineaydi35@gmail.com)  [44541625](tel:44541625)  [LinkedIn](#)

## PROFILE

Passionate about cybersecurity and cloud engineering, with hands-on experience in developing AI solutions for various projects. Skilled in network security, deep learning model creation, and web application development. Eager to apply technical expertise and innovative problem-solving in challenging environments

## PROFESSIONAL EXPERIENCE

|                                                                                                                                       |         |   |
|---------------------------------------------------------------------------------------------------------------------------------------|---------|---|
| <b>Summer Intern - Network Security</b>   Clinisys                                                                                    | 07/2024 | – |
| - Gained practical experience in network security protocols and implementation.                                                       |         |   |
| - Assisted in securing network infrastructure and identifying potential vulnerabilities                                               | 06/2025 |   |
|                                                                                                                                       | 08/2025 |   |
| <b>Summer Internship: Early Tumor Detection using Deep Learning</b>   Clinisys                                                        |         |   |
| - Designed and trained a Convolutional Neural Network (CNN) model for early detection of tumors from medical imaging (MRI, CT scans). |         |   |
| - Performed preprocessing of medical data and annotated medical images for training and evaluation.                                   | 08/2024 |   |
| <b>PFA Project - ECG Image Classification</b>   ENET'Com                                                                              |         |   |
| - Developed deep learning models for the classification of ECG images.                                                                |         |   |
| - Implemented models to accurately identify if a patient is ill based on ECG data.                                                    |         |   |

## EDUCATION

|                                                                          |         |   |
|--------------------------------------------------------------------------|---------|---|
| <b>ICT engineering</b>                                                   | 09/2023 | – |
| National School of Electronics and Telecommunications of Sfax (ENET'COM) | Present |   |
| <b>Preparatory School</b>                                                | 09/2021 | – |
| Faculty of Sciences of Sfax (FSS)                                        | 06/2023 |   |

## PROJECTS

### PFA Project - ECG Image Classification

- Created Deep Learning models for the classification of ECG images to determine patient health status.

### Roommates Expense Management Web App

- Developed a web application designed to manage and track expenses for roommates, ensuring fair and transparent financial distribution.

### Malware Development Project

- Engineered various malware samples, including one capable of launching an attack to significantly impact and break down a user's CPU.

## CERTIFICATES

- Microsoft Azure AI Fundamentals    HCIA-DATACom

- HCIA-CloudComputing

## SKILLS

---

- **Data Science & Machine Learning:** PyTorch, Numpy, Pandas, Scikit-learn, Seaborn, OpenCV
- **Programming Languages:** Python, JavaScript, TypeScript
- **Cybersecurity:** Network Security, Malware Analysis
- **Cloud Computing:** Cloud Engineering concepts
- **Web Technologies:** HTML, CSS, React, Next.js, Node.js
- **Database Systems:** MySQL, Firebase

## LANGUAGES

---

- English**  
TOEIC B2
- French**  
DELF B2
- Arabic**  
Native
