Profile

Hi, my name is Yassine Khraief. I am a highly motivated software engineer with strong skills in development, problem-solving, and teamwork. I am committed to delivering high-quality solutions and continuously improving my knowledge in software technologies and AI-driven applications.

Education

Engineering Degree in Computer Science

Private Higher School of Engineering and Technology (ESPRIT)

High School Diploma (Baccalaureate – Science)

High School of Lac 2

Experience

Intern – Accompany Consulting

July 2024 – September 2024

Business Intelligence and HR Dashboard Project

- Designed an HR Dashboard to optimize internal processes and support strategic human resource management.
- Developed and maintained BI dashboards and reports for client data.
- Analyzed data to provide actionable insights for decision-making.
- Collaborated with the team to streamline reporting processes and improve data workflows.

Projects

SkillGenie – AI-Powered Learning Companion

- Developed an AI-powered learning companion designed to personalize and enhance learning experiences.
- Implemented adaptive learning algorithms to recommend content based on user performance and preferences.

Virtual Bank – Online Banking Platform

- Developed a secure online banking platform for account management and transactions.
- Implemented user authentication, account tracking, and financial transaction modules.

Smart Travel Planner – Flight and Trip Planning App

- Built an app that suggests destinations and creates personalized travel plans based on user preferences.
- Designed interactive itineraries and recommendations for places to visit, eat, and explore.
