EDUCATION

ESPRIT École d'ingénieurs
Software Engineering – Specialization in ERP and Business Intelligence

2021 – Present

PROFESSIONAL EXPERIENCE

Engineering Internship 06/2025 – 08/2025

Design and Development of a Full-Stack Web Application with Integrated Artificial Intelligence Features

- **Developed AI modules in Python** (Machine Learning / Deep Learning) for data analysis and recommendation systems.
- **Contributed to an intelligent recommendation system** to enhance personalization and improve user experience.
- **Technologies used:** Angular, Node.js, MongoDB Compass, and Power BI.

Immersion Internship 06/2024 – 08/2024

Migration of a School Management System to a Modern Web Architecture

- **Participated in the redesign** of a client-server application into a fully web-based solution.
- **Contributed to performance optimization** and system maintainability improvements.
- **Technologies used:** PHP, Symfony, and Oracle.

Introductory Internship 06/2022 – 07/2022

Communication Experience in the Banking Sector

- **Discovered** the inner workings of a bank and the **collaboration between departments**.
- **Strengthened communication and teamwork skills** through professional interactions and cross-departmental coordination.

ACADEMIC PROJECTS

NutriFit 02/2024 – 04/2024

Creation of a **Web Platform** for Nutrition and Fitness Tracking

- **Developed** a web platform using **HTML, CSS, JavaFX, and Oracle (phpMyAdmin)**.
- **Implemented** user profiles and a **personalized food journal** for individualized progress tracking.

BOOKLY 02/2023 – 03/2023

Development of an **E-Commerce Website** for Books

- **Developed** an online bookstore using **JavaScript and PHP7**.
- **Implemented** user authentication, **catalog navigation**, and **order management** features.

SMART COURT 11/2022 – 12/2022

Development of a **Desktop Application** in Qt/C++ for Court Management

- **Developed** a desktop application for **case tracking and document management** using **Qt/C++**.
- **Implemented** features for efficient **case monitoring** and **document organization** within the judicial workflow.

OVERWATCH 12/2021 – 01/2022

Design of a **2D Game** in C/Arduino Integrating Real-Time Hardware-Software Interactions

- **Designed and developed** a 2D game using **C and Arduino**, integrating **real-time hardware-software interactions**.
- **Implemented** embedded logic to manage **sensor inputs and gameplay responses** in real time.

Cosmetic Supply Chain 01/2025 – 05/2025

Development of an **ERP/BI Solution** Integrating **Artificial Intelligence** Features

- **Developed** an ERP/BI solution integrating **AI capabilities** to support data-driven decision-making.
- **Utilized** Talend, Power BI, SSMS, Python (Machine Learning / Deep Learning), and Angular/Flask for the web interface.
- **Performed** web scraping, data analysis, and **interactive data visualization** tasks.

TECHNICAL SKILLS

Programming Languages

- Python , MATLAB , Java , C++ , HTML, CSS, JavaScript, PHP ,R

IA & Machine Learning

- Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, MLlib, Pandas, NumPy, Matplotlib, Seaborn, Plotly ,Microsoft Azure Machine Learning, MLflow, OpenAI API, TensorFlow Serving.

Technologies / Frameworks

- Angular ,Symfony ,Bootstrap ,Spring Boot ,Flask, .NET , Docker ,ML ,Qt Hadoop ,Apache Tomcat, Node.js ,Express.js ,Ajax ,FastAPI, TensorFlow ,PyTorch ,Apache Spark ,

Databases

- Microsoft SQL Server ,MySQL ,MongoDB ,Post-greSQL ,Oracle Database,Neo4j

CERTIFICATIONS

- Fundamentals of Deep Learning – NVIDIA
- Hashgraph Developer Course – Certificate of Completion
- AWS Academy Graduate – Cloud Foundations
